

Stratified Model Summary Responsibility and Accountability

Integration of Burglary Initiative & Stratified Model example

The efforts outlined by the Stratified Model are being done by TPD, but the framework further articulates the desired direction towards clarification and consistency within the departments policing and communication practices.

The crux of the framework is to achieve the department's burglary reduction goal by:

- Supporting and facilitating efforts through the levels by managing priorities with the burglary reduction in mind
- Holding those not making efforts towards the goal accountable
- Continual messaging top-down
- Consistent communication across all levels

Created by TPD CAU
